

GRANIT PARTS SUPPORTS TITAN MACHINERY DURING SWITCH TO NEW REFRIGERANT

The CNH Group is switching its new tractors and harvesters to the more environmentally friendly R1234yf refrigerant. This requires extensive technical adjustments in the dealerships' workshops, a challenge that the TITAN MACHINERY Group - together with GRANIT PARTS - has successfully met. The new air conditioning service unit required for this purpose was specially tailored to the requirements of TITAN MACHINERY by GRANIT PARTS together with the manufacturer. The first devices have now been delivered to various locations in Eastern Europe, and presented during a practical training session near Bucharest.

Heeslingen/Bucharest, 16th April 2025 - After intensive technical comparisons, TITAN MACHINERY has opted for the multi-gas air conditioning service unit AR 690 from CGS Handschug GmbH. The device has been specially adapted for mobile use by international service teams in the course of their daily workshop operations. In cooperation with GRANIT PARTS, a WiFi module for remote control and fast data transmission, additional handles for better handling, plus transport and storage options for tool use were integrated.

The first seven devices were handed over at a TITAN MACHINERY site near Bucharest at the end of March. They are intended for use in Romania, Bulgaria and Ukraine. The handover was accompanied by an intensive training session led by Sascha Handschug, Managing Director of CGS Handschug GmbH.

Pressemitteilung

International training for higher efficiency

The practical demonstrations and lively exchanges contributed to an interactive training session attended by technicians from TITAN MACHINERY branches in Romania, Bulgaria and Ukraine, as well as colleagues from GRANIT PARTS Romania. The training provided participants with information covering correct operation, initial settings, maintenance procedures and troubleshooting.

“Our workshops face new technical changes and challenges every day. Smooth on-site customer service is a matter of course for us,” explains Gregor Schedler, Service Manager for Europe at TITAN MACHINERY. “We will successfully manage the transition to the new R1234yf refrigerant, thanks in part to the successful collaboration with the GRANIT PARTS team which has offered excellent technical, internationally positioned service.”

About TITAN MACHINERY

Founded in 1980, TITAN MACHINERY operates over 100 full-service dealer locations for agricultural and construction equipment in the USA, as well as locations in Germany, Romania, Bulgaria, Ukraine and Australia. Each location represents one or more CNH brands, including Case IH, New Holland Agriculture, CASE Construction Equipment, New Holland Construction and CNH Capital.
